

## One-Touch Solution for School Safety

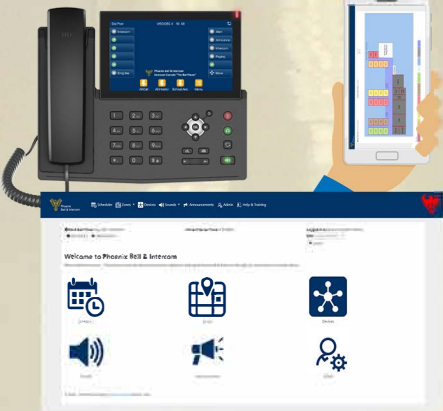

"A rise in campus violence following school re-openings in Spring of 2021 has heightened safety concerns"

In response, Galaxy Next Generation is building an expanded solution for school and district leaders to secure school campuses and send alerts when seconds count.

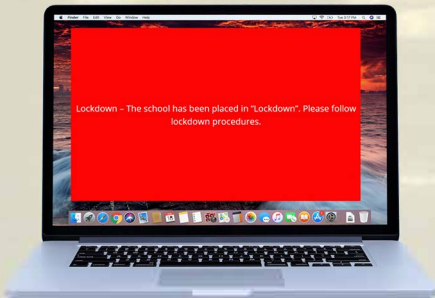

Through partnerships with **Haven Lock, Inc** and **In Force911**, instant door-locking capabilities and emergency communication with first responders will be fully integrated through the communication system that powers Galaxy Next Generation's G2 Visual Alerts.

**G2 ENHANCED SCHOOL**

**G2 VISUAL ALERTS**
