

G2 Control *For Education*

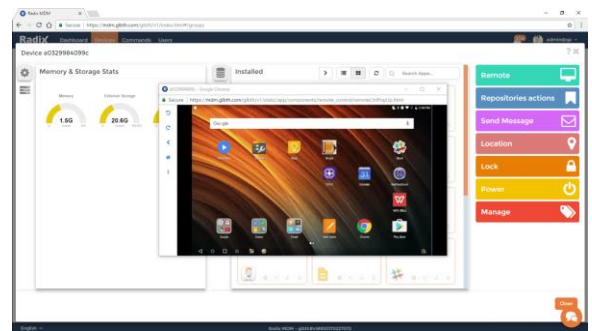

Seamless device management for your entire school ecosystem

A comprehensive device management solution built for the needs of modern teaching and learning, from K-12 schools to higher education; flexibly supports every device and OS from one easy-to-use platform.

Powering efficient and safe digital learning

G2 Control for Education lets you monitor, manage and control all of your school's devices from one easy-to-use cloud-based platform. The straightforward interface lets you complete complex configurations with ease for countless devices and OS.

Built for collaboration and instruction:

With a focus on digital learning, G2 Control for Education provides a customizable interface for teachers, principals, and IT administrators. It has never been so easy to effectively manage a large number of different devices, including Chromebooks, iPads, laptops, tablets, interactive touchscreens, and VR devices.

Key features:

- Centrally manage all device apps, OS settings, updates
- Apply and enforce school policies and regulations
- Remotely install applications & updates on all devices
- Simplify batch tasks and simultaneous workflows
- Take remote control over devices for assistance
- Create reports and filter for any criteria
- Group and tag devices according to predefined criteria
- Analyze device, web and app usage to make fact-based decisions
- Create Geo-fences and device location perimeters
- Lock, track and wipe lost or stolen devices
- Broadcast alerts and notices to all or selected devices
