

G2 ACTIVATOR APP

A POWERFUL PANIC ALERT APPLICATION
DESIGNED TO ENHANCE SAFETY

Empowering Safety in Critical Moments

Swift Action

G2 Activator ensures a rapid response with just a few taps or clicks. In high-stress situations, simplicity is paramount, and G2 Activator provides an intuitive interface for instant alert activation.

Visual and Audible Alerts

Combined with G2 Communicator; our comprehensive bell, paging, intercom and alerting software, G2 Activator can be used to send audio and visual alerts to devices across the campus. This ensures that everyone, regardless of their surroundings or abilities, receives crucial information.

Campus Wide Coverage

Activate alerts from anywhere on the campus, reaching all connected devices within the G2 Communicator system. Whether in classrooms, offices, or common areas; G2 Activator ensures that critical information is dispersed swiftly and effectively.

Versatility Beyond Systems

G2 Activator isn't limited to G2 Communicator. It can be utilized as a standalone panic alert solution to notify first responders, providing schools with a flexible and powerful tool for enhancing safety protocols.

How It Works:

Installation:

Easily install G2 Activator on any device with a web browser. Its compatibility ensures widespread accessibility, allowing staff to utilize existing devices for alert activation.

Activation:

When a crisis arises, activate the alert with just a few taps. G2 Activator's user friendly design minimizes stress and hesitation in urgent situations.

Critical Response:

Instantly notify the school/district/campuses designated critical response teams and key personnel via G2 Communicator. Provide real-time important information including audible and visual alerts to help expedite their response and improve the overall situational awareness.

G2 Activator seamlessly integrates into the audio and visual alerting system of G2 Communicator, serving as a vital component in your emergency communication strategy.
