

# Clocks and Visual Displays

Reliable time displays that not only keep you on schedule, but also deliver critical alerts through clear visual and audible signals

## With Two-Way Communication

### DIA - CDD1

Boasting a HD 23.8", 20Watt speakers, a microphone and flashers; this unit can do it all! The screen displays the time, weather, schedule, logo, has customizable scrollable text (across the top) and daily announcements on the side; it can do it all! It can even play Visual Events!

### IP Speaker with LCD Screen - CIPSPKMDC

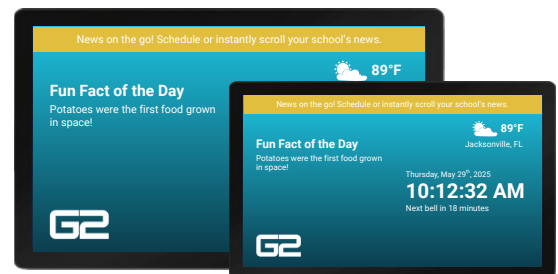

The operator can deliver two-way communication with the click of a button using the built in speaker and microphone. The LCD display shows real-time information and eliminates the need for a separate clock system! In the case of an emergency, the LCD display can show scrolling alert notifications.

## Visual Display Only

### CampusCast - CDD2L / CDD2S

These CampusCast devices are great for replacing your standard analog clock in classrooms, offices, cafeterias. They are great for sending Visual Events anywhere these units are located! These devices are a great option for any market and can be installed anywhere inside of the building!

\*CDD2L requires PoE++

\*CDD2S requires PoE+

## Visual Alert Capable

These devices have the ability to display alerts visually.

**More Than Time. Always Alert.**
