

ALYSSA'S LAW COMPLIANT MOBILE PANIC BUTTON

EVERY SECOND COUNTS

This affordable lanyard-style panic button can alert authorities instantly during emergencies, enabling faster response times and clearer communication with first responders.

WHAT HAPPENS WHEN PRESSED?

As part of the G2 Communicator system the G2 Mobile Panic Button can initiate a facility-wide alert. If your location has our G2 Paging and Intercom system, this device can act as a mobile trigger for emergency events.

Alerting Capability

It can initiate alerts in your G2 Communicator system. These alerts can have audible and visual alerts attached to them and they will automatically start in the case of a button press.

Contact Local Dispatch Through E-911

The Mobile Panic Button has two programmable buttons that can trigger events inside your facility and/or reach out to emergency services using our partnership with RapidSOS.

Push Notifications

Can push out notifications and text messages to any contact enrolled in G2 Communicator, alerting them of where the button was pressed and which location is in lockdown.

Group Chat

Staff members that receive the push notifications and click on the link will be brought to a group chat, allowing employees to be able to communicate with one another providing updates.

Location Triangulation

The Mobile Panic Button utilizes Beacons that can assist first responders in receiving an accurate location on the button pressers whereabouts, within the facilities grounds.

Easy Workforce Adoption

Innovative Technology Made in USA

Emergency Help In An Instant

With G2 Communicator You Can Get Two Solutions In One System

**Works as a stand-alone system, if you do not have our G2 Communicator system.*

**Can also integrate with 3rd party paging and intercom systems.*
