

G2 Visual Events

Protect Your Facility with Instant Visual Events

Announcements and Alerts have Never Been Easier!

Key Features and Benefits

- **Audible Alerts & Visual Events** – Ensure critical messages reach everyone, instantly.
- **Cross-Platform Compatible** – Works seamlessly on PC, Mac, Chromebook, Interactive Flat Panels and more.
- **Flexible Notification Triggers** – Initiate alerts from the Intercom Console, Web Interface, Physical Button and more.
- **Targeted Communication** – Notify key personnel instantly via email and SMS text.
- **Always Ready** – Software runs quietly in the background until you need it most.
- **Direct Messaging** – Send visual messages to a single device or broadcast to groups.
- **Fully Customizable** – Add custom text, images, and background colors to fit your message.
- **Scalable Announcements** – Create virtually unlimited visual alerts for any situation.
- **Building-Wide Coverage** – Disseminate vital information across your facility—and beyond.

G2 Visual Events takes over any internet-enabled screen with urgent text, images, or video—triggered instantly, from anywhere.

When the message is complete and done playing, the device will return to its previous screen automatically.

No More Delayed Messages

Protect Your Staff, Students and Customers Today!
